## **REVIEWS**

Working Stiff: Two Years, 262 Bodies and the Making of a Medical Examiner. Judy Melinek & T.J. Mitchell. Scribner Books, New York, August 2014.

"Haunting and illuminating...the stories from [Dr. Melinek's] average workdays should also transfix the reader with their demonstration that medical science can diagnose and console long after the heartbeat stops." — New York Times

"In this engrossing tale of how Melinek became a forensic pathologist, she pulls back the sheet to show readers just what goes on after someone dies... Armchair detectives and would-be forensic pathologists will find Melinek's well-written account to be inspiring and engaging."— Publishers Weekly

"Spellbinding. . . . Melinek is movingly empathetic toward the families of victims. . . . An unforgettable story." — Booklist (starred review)

"Melinek's enthusiasm for her calling is always apparent, and her writing is un-self-consciously bouncy, absorbed and mordant (though not caustic)... A transfixing account of death, from the mundane to the oddly hair-raising." — Kirkus Reviews
